

PUBLICATION LIST

1. Sudheesh, A.P., Mohan, N., Nimmy, F., **Rakesh S. Laishram***, and Richard Anderson*. 2019. Star-PAP controlled alternative polyadenylation coupled poly(A) tail length regulates expression in hypertrophic heart. **Nucleic Acid Res.** gkz875 (<https://doi.org/10.1093/nar/gkz875>). (***Corresponding Author**)
2. Mohan, N., Kumar, V., Kandala, D., Kartha, C.C. and **Rakesh S. Laishram**. 2018. A new splicing independent function of RBM10 controls specific 3'-UTR processing to regulate cardiac hypertrophy in the heart. **Cell Reports.** 24:3539-3553 (<https://doi.org/10.1016/j.celrep.2018.08.077>).
3. Sudheesh, A.P., and **Rakesh S. Laishram**. 2017. Nuclear phosphatidyl-inositol-phosphate type I kinase α coupled Star-PAP polyadenylation regulates cell invasion. **Mol. Cell. Biol.** 38:e00457-17 (doi.org/10.1128/MCB.00457-17).
4. Li, Weimin; W, Li, **Rakesh S. Laishram**, Hoque, M. Ji, Z, Tian, B, R. Anderson. 2017. Distinct regulation of alternative polyadenylation and gene expression by nuclear poly(A) polymerases. **Nucleic Acid Res.** 44 (2): 811-823.
5. Kandala, D., Mohan, N., Vivekakanda, A., Sudheesh, A.P., Reshmi, G., and **Rakesh S. Laishram**. 2016. CstF and 3'UTR *cis*-element determine Star-PAP specificity for target mRNA selection by excluding PAP α . **Nucleic Acid Res.** 44 (2): 811-823.
6. Mohan, N., Sudheesh A.P., Francis, N., Anderson, R.A. and **Rakesh S. Laishram**. 2015. Phosphorylation regulates Star-PAP PIPK1 α interaction and directs specificity toward mRNA targets. **Nucleic Acid Res.** 43: 7005-7020.
7. **Rakesh S. Laishram**. 2014. Poly(A) Polymerase (PAP) diversity in the cell: Star-PAP vs canonical PAP. **FEBS Letters.** 588: 2185-2197.
8. D. Ray, H. Kazan, K. Cook, M. Weirauch, H. N, X. Li, S. G, Albu, H. Zheng, H. Na, M. Irimia, L. Matzat, S. Smith, C. Y, S. K, B. Nabet, **Rakesh S. Laishram**, M. Qiao H. Lipshitz, F. Piano, A. Yang, A. Corbett, R. Crastens, et. al. 2013. A compendium of RNA-binding motifs for decoding gene regulation. **Nature.** 499: 172-177
9. Weimin Li*, **Rakesh S. Laishram***, Zhe Ji, Christy A. Barlow, Bin Tian, and Richard A. Anderson. 2012. Star-PAP Control of BIK Expression and Apoptosis is Regulated by Nuclear PIPK1 α and PKC δ Signaling. **Mol. Cell.** 45: 25-37. (***First Author**)
10. **Rakesh S. Laishram**, Christy A. Barlow, and Richard A. Anderson. 2011. CKI isoforms α and ϵ regulates Star-PAP target messages by modulating Star-PAP polyadenylation activity. **Nucleic Acid Research.** 39 (18): 7961-7973.
11. Rakesh S. Laishram and Richard A. Anderson. 2010. The poly (A) polymerase Star-PAP controls 3'-end cleavage by promoting CPSF interaction with pre-mRNA. **EMBO J.** 29: 4132-4135. **Highlighted by William F Marzluft. The EMBO Journal (2010) 29, 4066-4067.**

12. Christy A Barlow*, **Rakesh S Laishram*** and Richard A. Anderson. 2010. Nuclear Phosphoinositide signaling - an enigma in compartmental conundrum. **Trends in Cell Biol.** 20(1): 25-35. (**Equal first author and listed alphabetically*)
13. **Rakesh S. Laishram** and J. Gowrishankar. 2007. Environmental regulation at the promoter clearance step of bacterial transcription. **Genes Dev.** 21: 1258-1272
14. Nandineni, M.R., **Rakesh S. Laishram**, and J. Gowrishankar. 2004. Osmosensitivity associated with insertions in *ArgP (lciA)* or *glnE* in glutamate synthase (GOGAT)-deficient mutants of *E. coli*. **J. Bacteriol.** 186:6391-6399
15. Wiemin Li*, **Rakesh S. Laishram***, and Richard A. Anderson. 2013. The novel poly(A) polymerase Star-PAP is a signal-regulated switch at the 3'-end of mRNAs. **Adv. Biol. Reg.** 53: 64-76. (**First author*)
